## Startup Incubation Programme

Course: Business Modeling 2

| | |
|---|---|
| Cohort | 3rd Cohort North-East |
| Facilitator | Abubakar Bashir |
| Document Type | Lecture Document |
| Week | Week 3 |
| Lecture Title | Presentation and Reflection of the Interview Outcome. |
| Location | Gombe, Gombe State, Nigeria |
| Date | 18th, December, 2023 |

## Week 3: Presentation and Reflection

### AM Session: Presentation Preparation

- Presentation Skills Workshop
  - Provide guidance on effective presentation techniques.
  - Discuss key elements to include in the presentation of interview outcomes.
- Group Preparation Time
  - Groups work on preparing a concise presentation of their problem interviews and insights.

### PM Session: Presentation of Interview Outcome

- Group Presentations
  - Each group presents their problem hypothesis, assumptions, and the outcomes of the problem interviews.
  - Encourage peer feedback and questions.
- Reflection and Q&A
  - Facilitate a discussion on the overall experience and lessons learned.
  - Address any questions or concerns from the participants.

Week 3: Presentation and Reflection

AM Session: Presentation Preparation

1. Presentation Skills Workshop:

- Begin the session with a dynamic presentation skills workshop. Cover fundamental aspects of effective communication, including body language, vocal modulation, slide design, and maintaining audience engagement. Provide practical tips and interactive exercises to reinforce key concepts.

2. Guidance on Presentation Techniques:

- Offer guidance specific to presenting the outcomes of problem interviews. Discuss the importance of crafting a compelling narrative, emphasizing key findings, and tailoring the presentation to the audience's level of understanding. Provide insights into storytelling techniques to make the presentation more impactful.

3. Key Elements for Presentation:

- Discuss key elements that should be included in the presentation of interview outcomes. Emphasize the importance of a clear problem hypothesis, validated assumptions, memorable quotes or stories from interviews, and actionable insights for the startup. Highlight the need for a structured flow in the presentation.

4. Group Preparation Time:

- Allocate dedicated time for each group to work collaboratively on preparing their presentations. During this group preparation phase, participants should focus on condensing their findings into a concise and engaging format. Encourage them to consider visual aids, storytelling techniques, and ways to connect with the audience emotionally.

5. Facilitate Group Collaboration:

- Circulate among the groups to provide guidance, answer questions, and ensure that each group is progressing effectively. Encourage collaboration and discussion within the groups to draw out unique insights and perspectives from individual members.

6. Visual Aid Consideration:

- Discuss the effective use of visual aids, such as slides or charts, to complement the spoken presentation. Guide participants on how to strike a balance between visuals and verbal communication to enhance understanding.

7. Rehearsal Opportunities:

- Allow groups time for brief rehearsal sessions. Encourage them to practice their presentations within the group, offering constructive feedback to one another. Emphasize the importance of timing and clarity during rehearsals.

8. Addressing Presentation Challenges:

- Discuss common challenges associated with presenting findings and offer strategies for overcoming them. Cover topics such as managing nerves, handling unexpected questions, and adapting to different audience dynamics.

9. Final Preparation Checklist:

- Provide a checklist for final preparations, including considerations for technology, room setup, and any additional materials needed. Ensure that each group feels confident and well-prepared for the presentation session.

Conclusion of AM Session:

- Conclude the morning session by expressing confidence in the preparedness of the groups. Reinforce key presentation principles and remind participants of the valuable learning opportunities inherent in the upcoming presentations.

This structured AM session aims to equip participants with the essential presentation skills needed to effectively communicate the outcomes of their problem interviews. By combining a workshop with hands-on group preparation time, participants can actively apply the concepts discussed, fostering a practical understanding of impactful presentation techniques.

Real Scenario Example:

Let's consider an example based on a startup named "FitConnect" that focuses on addressing challenges related to maintaining a consistent fitness routine. In the AM session of Week 3, the group is preparing a presentation of their problem interviews and insights, using the FitConnect as an Example, followed by each startup founder presenting using their startup that they've Co-Founded.

FitConnect - Presentation Preparation Example:

1. Presentation Skills Workshop:

- The workshop begins with an interactive activity where participants practice different aspects of effective communication. They engage in exercises to improve body language, vocal variety, and slide design. The facilitator provides specific examples related to fitness, such as how to maintain a confident posture during a workout demonstration.

2. Guidance on Presentation Techniques:

- In the context of FitConnect, the guidance emphasizes the need for a compelling narrative. Participants are encouraged to share personal anecdotes from interviews, creating a story that resonates with the audience. Techniques for connecting with the audience emotionally are discussed, such as using before-and-after stories of individuals who overcame fitness challenges.

3. Key Elements for Presentation:

- The key elements discussed include a clear problem hypothesis: "Many individuals struggle to maintain a consistent fitness routine due to time constraints and lack of motivation." Validated assumptions include insights from interviews confirming these challenges. Memorable quotes from interviewees expressing frustration with traditional fitness apps are highlighted.

4. Group Preparation Time:

- FitConnect groups collaboratively work on condensing their findings into a concise presentation. They discuss the visual aids they will use, deciding to include a short video clip of an interviewee sharing their fitness journey. The group brainstorms ways to make their presentation engaging, such as incorporating interactive elements like a brief workout demonstration.

5. Facilitate Group Collaboration:

- The facilitator moves among the FitConnect groups, encouraging discussions on unique insights. One group identifies a common theme around the need for personalized workout plans, while another group focuses on the emotional aspect of fitness journeys, emphasizing the impact on mental well-being.

6. Visual Aid Consideration:

- The FitConnect groups consider using visuals that resonate with their fitness-focused audience. They decide to include infographics depicting survey results, before-and-after images of individuals who benefited from personalized fitness plans, and a slide showing the FitConnect app in action.

7. Rehearsal Opportunities:

- FitConnect groups conduct brief rehearsal sessions, offering constructive feedback to one another. They practice transitions between sections, ensuring a smooth flow. Feedback includes suggestions on maintaining enthusiasm, adjusting pacing, and maximizing engagement during the workout demonstration.

8. Addressing Presentation Challenges:

- The facilitator addresses challenges associated with presenting fitness-related content, such as potential body image concerns. The groups discuss strategies for creating an inclusive environment and emphasizing the importance of overall well-being rather than strict body aesthetics.

9. Final Preparation Checklist:

- FitConnect groups use a final preparation checklist to ensure they have all necessary materials, check technology requirements, and rehearse one final time. They feel confident and excited about presenting their insights.

Conclusion of AM Session:

- The morning session concludes with a motivating message, reminding participants that they are not only presenting data but sharing stories that have the potential to inspire positive change in the fitness industry. Participants leave the workshop feeling well-prepared and eager for the upcoming presentations.

This example illustrates how the FitConnect startup, focusing on fitness challenges, prepares for a presentation by incorporating practical and fitness-specific elements into the workshop and group preparation time.

Week 3: PM Session: Presentation of Interview Outcome

Group Presentations:

1. Introduction:
    - Begin the afternoon session by welcoming participants and introducing the purpose of the presentations. Emphasize that this is an opportunity for each group to share their problem hypothesis, assumptions, and the valuable insights gathered from problem interviews.
2. Order of Presentations:
    - Establish a predetermined order for group presentations. This could be based on a random selection, or you may choose to organize presentations according to specific themes or industries. Clearly communicate the order to the participating groups.
3. Time Allocation:
    - Allocate a specific amount of time for each group's presentation. Ensure that this allows for a comprehensive overview of their problem hypothesis, assumptions, and interview outcomes, while also leaving time for peer feedback and questions.
4. Presentation Format:
    - Encourage creativity and variety in presentation formats. Some groups may opt for traditional slides, while others may choose to incorporate interactive elements, storytelling, or demonstrations related to their startup concept. This diversity adds richness to the learning experience.
5. Problem Hypothesis and Assumptions:
    - As each group presents, pay close attention to how they articulate their problem hypothesis and assumptions. Ensure clarity and alignment with the information discussed during the AM session. This is a critical foundation for the rest of the presentation.

6. Outcomes of Problem Interviews:
    - Group presentations should delve into the outcomes of their problem interviews. Highlight key insights, emotional responses from interviewees, and any unexpected findings. This is the heart of the presentation, providing a rich context for the audience to understand the identified problems.

Encourage Peer Feedback and Questions:

1. Structured Feedback Sessions:
    - After each group presentation, allocate time for structured peer feedback sessions. Encourage participants to provide constructive feedback, highlighting what they found particularly impactful or areas where improvements can be made.
2. Feedback Categories:
    - Guide participants to provide feedback in specific categories, such as clarity of the problem hypothesis, effectiveness of storytelling, engagement with the audience, and the overall persuasiveness of the presentation. This helps ensure targeted and actionable feedback.
3. Question and Answer Period:
    - Open the floor for a question-and-answer period following each presentation. Encourage participants to ask clarifying questions about the problem space, the interview process, or the proposed startup solution. This facilitates a deeper understanding of each group's work.
4. Facilitator's Role:
    - As a facilitator, actively participate in the feedback and Q&A sessions. Provide additional insights, ask probing questions, and guide the discussion to ensure that participants gain a holistic understanding of the presented material.

5. Positive Reinforcement:
    - Throughout the feedback sessions, highlight positive aspects of each presentation. Acknowledge effective communication strategies, compelling storytelling, and innovative approaches. Positive reinforcement fosters a supportive learning environment.
6. Encouragement of Diverse Perspectives:
    - Emphasize the value of diverse perspectives during the feedback sessions. Encourage participants to appreciate the unique strengths of each group's approach and share insights gained from the presentations.

Nutshell:

1. Summary and Reflection:
    - We will be concluding the session with a brief summary of the key insights gained from the group presentations. We will also encourage the startups to reflect on the collective learning experience and the diverse problem spaces explored by their peers.
2. Transition to Reflection and Q&A:
    - Transition smoothly to the reflection and Q&A session, setting the stage for a deeper discussion on the overall experience, lessons learned, and potential adjustments for future presentations.
3. Preparation for Next Session:
    - Briefly outline what participants can expect in the next session and any preparatory steps they should take. Reinforce the importance of continuous improvement and iterative learning.

This structured PM session provides a platform for participants to showcase their problem interviews and receive constructive feedback from their peers. The combination of presentations, feedback sessions, and Q&A creates a dynamic and engaging learning environment that fosters collaborative growth among participants.

## Conclusion of Customer Problem Fit (CPF) Sessions

### Summarize Key Takeaways:

1. **Customer Empathy:**
    - Emphasize the significance of understanding and empathizing with the customer's needs, pain points, and aspirations. Reiterate that successful startups are built on a foundation of genuine empathy.
2. **Validation and Iteration:**
    - Highlight the iterative nature of the CPF process. Reinforce that the initial problem hypothesis is a starting point, and continuous validation through problem interviews is essential for refining assumptions and ensuring alignment with customer needs.
3. **Importance of Insights:**
    - Summarize the key insights gained from the problem interviews. Discuss common themes, unexpected findings, and the richness of information obtained directly from potential customers.

### Reinforce the Importance of Customer Empathy:

1. **Continuous Customer Validation:**
    - Stress the importance of ongoing customer validation. Encourage participants to view customer empathy as a continuous process rather than a one-time activity. Customer needs and market dynamics evolve, requiring startups to stay attuned to these changes.
2. **Adaptability and Learning:**
    - Reinforce the idea that adaptability and a willingness to learn from customers are crucial traits for startup founders. The startup journey is dynamic, and the ability to pivot based on customer feedback is a key determinant of success.

3. Building Stronger Connections:
    - Highlight how customer empathy builds stronger connections between the startup and its target audience. Customers are more likely to engage with and support a business that genuinely understands and addresses their needs.

Providing Guidance on Next Steps:

1. Transition to Solution Validation:
    - Guide participating startup on the transition from CPF to Problem Solution Fit (PSF) Solution Validation. Introducing the concept of developing and testing potential solutions based on the refined understanding of customer problems obtained during CPF.
2. Introduction to Minimum Viable Product (MVP):
    - Briefly introduce the concept of Problem Solution Fit (PSF) and Minimum Viable Product (MVP) as a practical step in the solution validation phase. Discuss how creating a simple version of the product/service can facilitate early testing and validation.
3. Iterative Process:
    - Emphasize that the business modeling process is iterative. Each phase, including CPF and Solution Validation, contributes to refining the startup's business model. Encourage participants to embrace the iterative nature and use feedback as a catalyst for improvement.

## Follow-up Activities (Optional):

1. **Additional Resources:**
    - Provide recommended reading materials and resources for further understanding of customer discovery, problem-solution fit, and solution validation. These resources can include books, articles, and online courses.
2. **One-on-One Sessions with Incubation Managers:**
    - Offer startup participants the option to schedule one-on-one sessions with the facilitator. This provides an opportunity for personalized feedback, guidance, and addressing specific challenges or questions unique to each startup.
3. **Encourage Networking:**
    - Encourage participants to engage in networking opportunities within the startup community. Networking can provide additional insights, mentorship, and potential collaborations that enhance the overall startup journey.

## Conclusion:

1. **Acknowledgment and Motivation:**
    - Express appreciation for the participants' active engagement throughout the CPF sessions. Acknowledge their dedication to the learning process and their commitment to understanding customer problems.
2. **Inspiration for the Journey Ahead:**
    - Conclude the lesson plan by inspiring participants for the journey ahead. Remind them that the insights gained from CPF lay a solid foundation for building solutions that truly resonate with their target audience.
3. **Next Steps and Continued Learning:**
    - Provide a brief overview of the next steps in the business modeling process. Encourage participants to approach solution validation with the same curiosity and commitment to customer understanding demonstrated during CPF.

This comprehensive conclusion serves to consolidate the key learnings from the CPF sessions, reinforce the importance of customer empathy, and guide participants toward the next steps in their startup journey. The optional follow-up activities offer participants additional avenues for learning and support as they continue to develop and refine their startup concepts.
